LINE ITEM #1: Assess identified and potential leaks. Specify repairs required. Provide details pricing breakdown for any structural repairs recommended or required. Repairs are to be itemized by materials and labor in Line Items 2 and 3.

Attachment for Line Item 1:None

VENDOR 1 NOTES:

EXCEPTION(S) :

We are only bidding on the new roof project

VENDOR 2 NOTES:

NOTES :Upon site inspection and identifying a substantial amount of leaks from the roof, it was determined that the repairs required on the roof will, in our opinion, exceed the 25% rule. What this means is that if there are repairs performed on a roof, within a one year period, that exceed 25% of the total roof area, the roof needs to be replaced. We have attached a copy of the building code and also some pictures of the damaged roof decking. Also, in our opinion, even after making the repairs to the visible areas, there will be other additional leaking from other areas as the roof is a shingle over roof and is not recommended for adequate attachment.

EXCEPTION(S) :

This Proposal is for 25yr 3 Tab shingle.
