** Please call 800-903-5774 for a more extensive inventory list*

PRE-EVENT / CONTINGENCY SERVICES

When timing is of the essence...

When disaster strikes, there is a sense of helplessness in stopping the destruction. It's immediately after the damage that one can make the biggest difference. When a National Agreement is signed with DRI, a dedicated team of specialists is on call and ready to minimize damage to assets and restore business operations. This program provides a dedicated recovery team that will respond 24 hours a day, 365 days a year to mitigate the loss.

In the event of an area wide disaster when resources are scarce, National Accounts will receive priority service. This program focuses on developing relationships with the appropriate parties prior to a loss. DRI's proactive approach leads to faster start times and helps minimize business interruption.

DRI will implement a pre-designed plan with consideration to the client's specific priorities. National Accounts have the opportunity to pre-approve DRI's pricing and billing structure, thus allowing cost containment. DRI coordinates its recovery efforts with pre-approved local and national vendors and subcontractors.

EMERGENCY SERVICES

When size doesn't matter...

Regardless, if you have one facility or 3,000 facilities, you will get the same expertise and quality service that our clients have come to expect. Your business is important to us, regardless if it is a leaking water heater causing serious mold issues or if you need assistance after a catastrophic hurricane, we will be there for you!

Our Emergency Response Network is strategically located throughout the United States and can provide 24/7/365 service for each and every facility that you manage.

EMERGENCY POWER

And then there was light...

DRI's Power Services division was created to provide products and services to facilities both public and private -- before, during and after a disaster event. Unlike many power suppliers, our technicians will transport, hook up, provide maintenance and refueling for the generators. DRI is poised to assist you in the pre planning stages, providing solutions to restore operations quickly and minimize downtime risk. Our experienced management team and skilled professional crews are on call and ready to respond to your emergency.

SERVICES INCLUDE:
GENERATOR RENTAL & SALES
GENERATOR MAINTENANCE
EMERGENCY GENERATOR REFUELING

RESTORATION & RECONSTRUCTION

A facelift or full body reconstruction...

DRI is the single source solution for all your restoration/reconstruction needs. When your business is closed for any occurrence there is lost revenue while the expenses keep skyrocketing. DRI understands and will provide 24/7/365 rapid response; thereby, keeping costs in check and getting your business back up and running without delay.

We will provide you everything you need to make your job hassle free. No matter how large or small the restoration/reconstruction services needed for your facility; DRI will provide you a single source solution for all your facilities' needs!

The benefits of our Single Source approach:

- ✓ One Point of Contact
- ✓ Streamlined Communication
- ✓ "The Buck Stops Here" for Quality Control
- ✓ One Company = One Bill = Cost Containment
- ✓ Fewer vendors operating in a high stress environment

One simple phone call is all you need to make!
